## Tryon's Northwest Trade Gun Lock.....#Lock-Tryon

Edward K. Tryon of Philadelphia was a major gun maker, supplying fur traders, Indian agents, merchants, and the U.S. Government with well made rifles, muskets and pistols. His guns are highly collectible! Made for Track by R. E. Davis, it fits our Northwest Trade Gun stock, and will easily replace a worn Pedersoli *LOTT* lock, or North Star Arms trade gun lock. In ten minutes your gun can have a new Tryon lock.

A tiny bit larger than the North Star trade gun lock made by the late Curly Gustomski, we recommend inletting this lock as a replacement for the North Star lock, when spare parts are exhausted.

You might stamp our "sitting fox" or "tombstone fox" mark, or maker's name on this plain plate. Many trophy shops can engrave your design. Refer to *The Northwest Gun* by Charles Hanson, Jr. to view examples of marked and engraved lock plates. Original Northwest trade guns nearly always have serpent sideplates. See our sideplate pages.

The simple pan matches the round faced plate. This pan has a bride arm to support the frizzen pivot screw. The frizzen fits well.

Fitted with a fly, this lock can be used with set triggers. However, N.M.L.R.A. rules do not allow set triggers in Northwest Trade Gun events. Our Tryon trade gun lock can be used on guns with 28, 24, 20, 16, 12, or 10 gauge barrels up to 1-1/4" octagon or round, at the breech.

**#Lock-Tryon** E. K. Tryon's Northwest Trade Gun lock **only \$145.99**

## Parts for Tryon's North West Trade Gun Lock ..... #Lock-Tryon

Most parts are finished and hardened. A few parts require fitting, drilling in place, and tempering. We stock all these parts for immediate delivery.

<b>#Lock-1750-Ms</b>	mainspring, tempered steel	<b>\$19.99</b>

## Gunmaker's Tip:

Older variations of our popular Tryon's Northwest Trade Gun Lock can be repaired using our parts. These include the early Northwest Trade Gun locks by Peter Allan, hand made locks by N. V. Sikligar, India, and early R. E. Davis locks which carry his "circle - D" hallmark inside.

This whole lock can be used to replace the similar *LOTT* lock by Davide Pedersoli, the Blunderbuss lock from India, and the slightly smaller fox-in-circle trade gun flint locks by North Star Arms.

Specify which lock requires new parts.
