

**Jim Bridger's Hawken locks, percussion, right & left:**

Designed by Ron Long, this famous lock was used by Green River Rifle Works of Roosevelt, Utah, on their Jim Bridger Hawken rifle. Track acquired the GRRW Bridger Hawken stock pattern. We offer Bridger Hawken stocks pre-inlet for the right lock.

Left hand shooters can build a Hawken, using our matching Hawken left lock. Wax castings are nicely finished, tempered, assembled, and signed by R. E. Davis. Smooth internal parts, polished critical points and bearing surfaces, and a heavy duty mainspring give this lock a crisp action. Fitted with a fly, this lock works well with Hawken style double set triggers.

Our matching right and left locks emulate locks made by the Hawken brothers of Saint Louis, circa 1840 - 1850.

# Blickensdorfer Schuetzen cap lock

**Blickensdorfer Schuetzen lock, right hand.....#Lock-Sch-R**

The late percussion lock features Hawken style internal parts, with a fly detent to allow double set triggers, virtually a requirement for a Schuetzen target rifle. The hammer is made to reach the nipple on our big 1" or 1-1/8" octagon or larger breech plug.
