

Triggerguard, wax cast brass or steel#TG-Hawk-E-B or I

An early Hawken triggerguard with flat grip-rail. The front lug may be threaded to engage a matching hole in your trigger plate. This triggerguard is appropriate for a fullstock flint or early percussion halfstock rifle. The rear end is mounted to the long trigger plate, using a screw from inside the trigger plate into the apex of the rear loop. Original guns often show a "round tip" rear screw, with two threads extended.

Thread the front stud to 1/4-28 using your die, drill and tap your Hawken trigger plate to accept this triggerguard.

- #TG-Hawk-E-B triggerguard, wax cast brass **only \$33.99**
- #TG-Hawk-E-I triggerguard, wax cast steel **only \$21.99**

Triggerguard, wax cast iron (steel) #TG-Hawk-N-I

Our earliest Hawken style triggerguard, this wax cast steel guard has threads cast into the front lug, to engage a hole in your Hawken style double set trigger plate. We recommend using an early style Hawken trigger with straight or flat front trigger. This guard would be appropriate on a fullstock or early halfstock rifle. Cast is traditional steel, only.

- #TG-Hawk-N-I triggerguard, wax cast steel **only \$22.99**
- #Tap-1/4-28-T taper tap for 1/4-28, carbon steel **only \$ 3.99**
- #Drill-3 tap drill for 1/4-28, .2130" diameter **only \$ 3.59**

Triggerguard, for T/C Hawken, wax cast iron (steel)#TG-Hawk-TC-I

A classic late Hawken triggerguard for half-stock rifles. Designed to be screwed in place rather than mounted in a traditional Hawken fashion. Order two of our un-plated screw-6x1/2, #Screw-6x12, to retain this triggerguard.

- #TG-Hawk-TC-I triggerguard, wax cast steel **\$22.99**
