

Create a fine early American powder horn, following the step-by-step color photographs in this book by Scott & Cathy Sibley. **#Book-R18CPH** *Recreating 18C Powder Horn* **only \$19.95**

## Polished Cow Horns

**Raw Horns, polished, white for scrimshaw, or mottled colors:**

Our scrimshaw quality horns are cleaned, sanded and polished, but not ruined by excess buffing. We prefer the hand scraped satin appearance of old horns. Rub the horn, lengthwise, with 0000 steel wool, or abrasive cleanser to reduce the shine. Rub along the grain direction, like wood. Dimensions are for the longest arc, measured around the outside of the curve of the horn. White horns are prized for scrimshaw engraving. Most cow horns are darker mottled colors.

White horns are scarce, not always available from stock. Check our web site for In-Stock status, at [www.trackofthewolf.com](http://www.trackofthewolf.com)

**Small Horn, about 6 to 8" arc, for priming horn.**

**#Horn-P-SW** horn, small, 6 to 8" arc, mostly white **only \$21.99**

**#Horn-P-SS** horn, small, 6 to 8" arc, mottled dark **only \$13.99**

**Medium Horn, about 8 to 10" arc, for day horn.**

**#Horn-P-MW** horn, medium, 8 to 10", mostly white **only \$23.99**

**#Horn-P-MS** horn, medium, 8 to 10", mottled dark **only \$21.99**

**Large Horn, about 10 to 14" arc, for powder horn.**

**#Horn-P-LW** horn, large, 10 to 14", mostly white **only \$25.99**

**#Horn-P-LS** horn, large, 10 to 14", mottled dark **only \$18.99**

**Ugly Horn, odd shaped, or clipped tip.....#Horn-Ugly**

Make flask horns, flat horns, buttons, combs, inlays, turnings or practice your horn carving or scrimshaw engraving on these horns. Not always available, limited supply

**#Horn-Ugly** oddly shaped or flawed raw horn **only \$ 2.50**

**#SP-PV-3**  
priming  
valve  
**\$6.50**

**#PV-1**  
priming  
valve  
**\$6.99**

**#PV-3**  
priming  
valve  
**\$6.99**

## Flint Priming Flasks

**Flint Priming Valves.....#PV-1 or 3**

Our brass priming valves have a knurled body, which may be glued to your wood, horn, or antler flask. Drill deep enough to hold a quantity of priming powder. The valve unscrews, to allow filling through the body. Use FFFFg black powder for priming only.

**#PV-1** 1 grain valve, for 7/32" hole **only \$ 6.99**

**#PV-3** 3 grain valve, for 9/32" hole **only \$ 6.99**

**Flint Priming Flasks .....#Flask-PP-3, 4 or FF**

Brass flasks for FFFFg powder. Our smallest flask dispenses about 3 grains for pistols or rifles. Our largest flask dispenses 4 grains for rifles, fusils or muskets. Our hunter's flask has a free flow valve.

**#Flask-PP-3** throws 3 grains of FFFFg **only \$12.99**

**#Flask-PP-4** throws 4 grains of FFFFg **only \$13.99**

**#Flask-PP-FF** with free-flow valve for FFFFg **only \$12.99**

**Flint Priming Valve, for powder flask.....#SP-PV3 or #SPS-PV3**

Priming valve for a Colt size flask, or Pocket flask using the smaller spout. The valve is used by removing the flask valve spring, locking the flask valve open and threading the priming valve into the spout hole. Designed for FFFFg black powder only, it throws about 3 grains.

**#SP-PV-3** for Colt and large flasks, 10-1mm threads **\$6.50**

**#SPS-PV-3** for Pocket and small flasks, 8-75mm threads **\$6.50**

**#Flask-Tiny-P**  
priming  
flask  
**\$24.99**

**Tiny Priming Flask.....#Flask-Tiny-P**

Our tiny priming flask has a copper body and a Sykes patent head with spring-loaded release lever. The head unscrews from its brass collar for easy filling. Measures 3-1/8" overall.

**#Flask-Tiny-P** tiny priming flask **only \$24.99**

**#Flask-PP-3**  
priming  
flask  
**\$12.99**

**#Flask-PP-4**  
priming  
flask  
**\$13.99**

**#Flask-PP-FF**  
priming  
flask  
**\$12.99**

**Percussion Nipple Priming Flask.....#Primer-B**

This tiny flask dispenses priming powder directly into the nipple, to clear a misfire. It must be filled with very finely granulated black powder. The inside cone shape fits all nipple sizes. For clearing misfires, only.

**#Primer-B** nipple primer, brass **only \$10.99**
